

Symantec Endpoint Protection 14

Intelligent Protection Against the Next Generation of Threats

Attackers are employing more sophisticated techniques. You need a solution that combines next generation and essential endpoint technology to address the growing threat.

Symantec Endpoint Protection 14 fuses advanced machine learning AI with critical technologies, delivering the most complete endpoint security on the planet. Symantec's Global Intelligent Network synthesizes intelligence **from 175 million endpoints to stop 99.9 percent** of new and emerging threats every day.

- **Optimize** performance in a single platform/agent
- **Detect** and block threats across the attack chain with low false positives
- **Detect** threats anywhere and remediate on SEP with integration to other security products
- **Deploy** across distributed and diverse IT environments of any size with a highly scalable architecture
